Professional Summary

Results-driven Software Engineer and open-source contributor with 1237+ commits across 240+ repositories. Proven ability to build scalable backend systems, integrate AI pipelines, and ship from zero to one. Passionate about driving measurable impact, optimizing system architectures, and delivering value in fast-paced startup environments.

Education

CVR College Of Engineering

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

Hyderabad, India

CGPA: 7.74

Experience & Leadership

Open Source Contributor

Jan. 2024 – Present

Global Open Source Ecosystem

Remote

- Contributed to 240+ repositories across AI and DevOps ecosystems, maintaining an output of 1237+ annual commits.
- Created and reviewed 150+ PRs with active discussions (12+ comments/PR), improving schema validation and reliability.

Google Developer Student Clubs, CVRCE

Oct. 2024 – Present

Android Team Lead

Hyderabad, India

- Led 10+ Android developers, organizing technical workshops that trained and impacted 150+ students.
- Mentored juniors in Kotlin and Jetpack Compose, improving overall team project completion rates by 40%.

Projects

V.E.R.I.T.A.S | Flutter, Dart, Riverpod, REST APIs

- Built a scalable forensic platform processing 1000+ media samples using multi-signal AI to detect synthetic media.
- Improved detection reliability by 30% and deployed REST APIs handling 200+ daily requests with optimized latency.

CareSync | Next.js, Python, Gemini API, MongoDB

- Developed an AI mental health chatbot serving 200+ users, improving engagement by 35% via empathetic UX design.
- Reduced API latency by 25% using optimized Python processing while ensuring 100% secure, anonymized data handling.

FoodAid | MERN Stack, Socket.IO, Mapbox API

- Built a real-time donation platform connecting 50+ users, cutting coordination delays by 60% utilizing Socket.IO.
- Integrated Mapbox for live tracking across 10+ routes, reducing food pickup response times by 40%.

Technical Skills

Languages: Java, JavaScript, TypeScript, C, Kotlin, Python, HTML, CSS, SQL

Frameworks & Tools: ExpressJS, NodeJS, ReactJS, NextJS, Jetpack Compose, Git, Docker, AWS, Jenkins

Databases: MongoDB, PostgreSQL, SQLite, MySQL, Firebase

Problem Solving: Solved 300+ Data Structures and Algorithms problems on LeetCode

Achievements & Certifications

12th Place Globally: Apertre 3.0 Open Source Program

36th Position (Top 50 Contributor): IEEE Summer of Code 2025 (IEEE Computer Society BMSIT&M)

Winner (1st Place): Codestone 1.0 National-Level Hackathon, Alpha School of Rayat Bahra University (Team CodeNyx)

Guinness World Record Holder: Google Agentathon Selected Participant (Offline Event)

Certifications: AI/ML Foundations (Deep Learning), DBMS (Oracle SQL, PL/SQL), Advanced Data Structures
